

# SCHOOL-BASED HEALTH CENTER DATA HUB

## JUST HEALTH

Comprehensive screening tool promotes stigma-free communication.

## OPERATIONAL PLAN

Details on clinic hours, demographics, quality improvement goals, and more.

## PATIENT SATISFACTION

Vital perspectives on engagement, health literacy, and health outcomes.

## EHR INTEGRATION

Data on every patient, every visit, every code, revealing trends over time.

## WE LIVE IN A WORLD OVERFLOWING WITH DATA.

Information is plentiful but not always useful.

Apex puts the right data in the right hands at the right time. We transform data to insight, collecting relevant data from a variety of sources, relating it in an integrated way, and creating reports that address process, quality, and outcomes. All to drive a cycle of reality testing, learning, and improvement.

The School-Based Health Center (SBHC) Data Hub is a data ecosystem that brings together multiple technologies and data sources, including our own mobile and web-based tools. We collect big picture and patient-level data, linking it to make implementation and evaluation better.

We utilize all industry standards for data exchange to facilitate data collection for secondary sources.

## REPORTING

Integrated data sets and sources support a powerful output: Comprehensive reporting to ask and answer better questions, building knowledge together. All to inform health promotion, population management, and meaningful evaluation.

## CONTACT US

Let's talk about making evaluation, data, and our suite of tools work for YOU.

## RELEVANT. INTEGRATED. VISUALIZED. USEFUL.

It's the one data solution when there is no one data solution.
